Provisional program

1st day | Thursday

08h30  Registration

08h45  Welcome  
Paulo Rego

09h00  Hip morphology - Update  
Moderator: Diego Collado

- Hip anatomy - Relevant structures and function for hip preservation  
Paulo Rego

- Hip vascular update: blood supply of acetabular labrum. Surgical implication  
Morteza Kalhor

- Portals and normal arthroscopic anatomy hip  
Luís Pérez Carro

- Hip Imaging an update  
Vasco Mascarenhas

- Dynamic assessment of adult hips with ultrasound  
Michael Millis

- The characteristics of pelvic tilt in young female developmental hip dysplasia patients  
Hui Cheng

11h00  Hip abnormal mechanics  
Moderator: Paulo Rego

- Functional antetorsion of the femur - Position of the greater tochanter  
Martin Beck

- Hip function & torsional deformities of the lower limb  
Paulo Rego

- Hip combined version, relevance for FAI treatment  
Filipe Oliveira

- FAI - Pathophysiology & damage pattern  
Michael Dienst

Discussion

12h00  Patient selection & indications for hip preserving surgery  
Moderator: Óliver Marín-Peña

- The painful hip - A plea for the clinical exam  
Hubert Nötzli

- Hip arthroscopy: optimizing patient selection  
Thomas Bird

- Osteoarthritis of the hip - When to scope, when to replace?  
Michael Dienst

- CAM femoroacetabular impingement: can we prevent arthritis?  
Paul Beaulé

Discussion

10h30  Coffee break
Provisional program

13h00 Lunch

14h30 **Surgery for FAI technique & results - I**
Moderator: Hubert Nötzli

Surgical hip dislocation - Evolution of the technique
Diego Collado

Access and decision for peripheral or central compartment first
Pedro Dantas

Cam impingement - Update
Marc Tey

Pincer impingement - Update
Pedro Dantas

Suture pattern strategies for arthroscopic hip labral repair
Thomas Bird

Discussion

15h30 **Surgery for FAI technique & results - II**
Moderator: Paul Beaulé

Defining the parameters of quality for hip preservation surgery
Paul Beaulé

12 years results after surgical hip dislocation to treat FAI
Hubert Nötzli

Reverse PAO results for overcoverage
Michael Millis

Hip arthroscopic results from the Iberic Hip Preservation Group
Oliver Marin-Peña

Patient-patient support to improve outcomes in adult hip preservation surgery
Michael Millis

Discussion

16h45 Coffee break

17h15 **Special topics**
Moderator: Martin Beck

Hip arthroscopy in athletes: a personal journey
Thomas Bird

Endoscopic sciatic nerve release. Deep gluteal syndrome and ischiofemoral space syndrome
Luís Pérez Carro

Persistent pain after hip arthroscopies - Management
Michael Dienst

The capsular arthroplasty for young patients with unilateral hip dislocation
Hui Cheng

Endoscopic treatment of hamstrings pathology
Jorge Cruz Melo

Hip abductors pathology
Marc Tey

Discussion

18h00 End of day 1
Provisional program

2nd day | Friday

08h30  Live surgery & Cadaver demonstration

12h00  Coffee break

12h30  Children and adolescent hip - Update
       Moderator: Michael Millis
       Slipped femoral capital femoral epiphysis treatment update
       Paulo Rego

       Surgical particularities in severely deformed chronic slips
       Rheinold Ganz

       Pattern of impingement in valgus SCFE
       Morteza Kalhor

       Head-neck deformities other than slips
       Rheinold Ganz

       Head reduction osteotomy as a true alternative in Perthes disease
       Diego Collado

       Computer simulation and jig assisted femoral head osteotomy in severely deformed Perthes hips
       Rheinold Ganz

       Discussion

14h00  Lunch

15h00  Hip instability & displasia
       Moderator: Paulo Rego

       A new comprehensive classification for acetabular dysplasia
       Paul Beaulé

       How to assess instability of the hip?
       Martin Beck

       Technical challenges in rectus sparing PAO. A cadaveric study
       Morteza Kalhor

       Hip dysplasia - Arthroscopy vs Osteotomy
       Michael Dienst

       Longterm outcomes of periacetabular ostetomy
       Michael Millis

       Results of simultaneous acetabular and femoral surgery in severely deformed pediatric hips. Case reports
       Rheinold Ganz

       Discussion

16h30  Coffee break

17h00  Hip replacement: perspective of the hip preserving surgeon
       Moderator: Pedro Dantas

       Current indications for hip resurfacing: surgical technique and implant design
       Paul Beaulé
Provisional program

Anterior approach for THR
Pedro Pinto

Total Hip replacement in hip dysplasia
Hubert Nötzli

Bone preservation in total hip revision surgery
Hubert Nötzli

Discussion

18h00 Closing remarks
Paulo Rego

18h10 Closure

Chairman:
Paulo Rego (PRT)

Speakers:
Diego Collado (ESP) | Filipe Oliveira (PRT) | Hubert Nötzli (CHE) | Hui Cheng (CHN) | Jorge Cruz Melo (PRT) | Luis Pérez Carro (ESP) | Marc Tey (ESP) | Martin Beck (CHE)
Michael Dienst (DEU) | Michael Millis (USA) | Morteza Kalhor (IRN) | Oliver Marin-Peña (ESP) | Paul Beaulé (CAN) | Pedro Dantas (PRT) | Pedro Pinto (PRT)
Rheinold Ganz (CHE) | Thomas Bird (USA) | Vasco Mascarenhas (PRT)
